

getElementByTagName("tagname")

\*\* HERE ALSO WE HAVE TO USE INDEX to get OUTPUT

```
10.getTagName.html > html > body
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1>N V V VARSHITH</h1>
    <h1>LPU</h1>

    <h2>CSE</h2>
    <h2>DS</h2>

    <button onclick="clickMe()">CLICK ME</button>

    <script src="10.getTagName.js"></script>
  </body>
</html>
```

```
10.getTagName.js > clickMe
1  function clickMe() {
2    var name1 = document.getElementsByTagName("h1");
3    name1[0].textContent = "NAGUBANDI VEERA VENKATA VARSHITH";
4    name1[0].style.color = "red";
5
6    name1[1].textContent = "LOVELY PROFESSIONAL UNIVERSITY";
7    name1[1].style.color = "green";
8
9    var name2 = document.getElementsByTagName("h2");
10   name2[0].textContent = "COMPUTER SCIENCE AND ENGINEERING";
11   name2[0].style.color = "blue";
12
13   name2[1].textContent = "DATA SCIENCE";
14   name2[1].style.color = "orange";
15 }
16
```

BEFORE CLICKING

**N V V VARSHITH**

**LPU**

**CSE**

**DS**

CLICK ME

AFTER CLICKING

---

**NAGUBANDI VEERA VENKATA VARSHITH**

**LOVELY PROFESSIONAL UNIVERSITY**

**COMPUTER SCIENCE AND ENGINEERING**

**DATA SCIENCE**
