

Elements

What are Elements ?

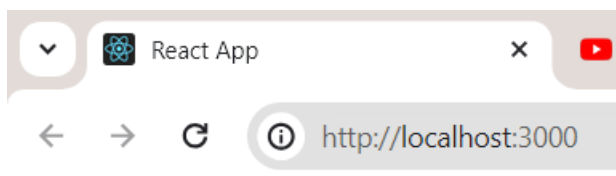

How to Create Elements ?

Element Rules

Element Styling

CLASS NAME IN REACT

```
c > App.jsx > ...
1  import React from "react";
2
3  //const a = "Varshith";
4  //const b = "Nagubandi";
5
6  function App() {
7    return (
8      <div className="varshith">
9        <p className="para1">My Name is : Varshith</p>
10     </div>
11   );
12 }
13
14 export default App;
15
```

My Name is : Varshith

Now adding css in App.css and import it on App.jsx

```
App.jsx / ...
1  import React from "react";
2  import "../App.css";
3
4  //const a = "Varshith";
5  //const b = "Nagubandi";
6
7  function App() {
8    return (
9      <div className="varshith">
10        <p className="para1">My Name is : Varshith</p>
11      </div>
12    );
13  }
14
15  export default App;
16
```

```
src > # App.css > .varshith
1  .varshith {
2    background-color: black;
3    border-style: dashed;
4    border-color: blue;
5    border-radius: 10px;
6    padding-left: 10px;
7  }
8  .para1 {
9    color: aliceblue;
10 }
11
```

MyName is : Varshith
