

HTTP MODULE

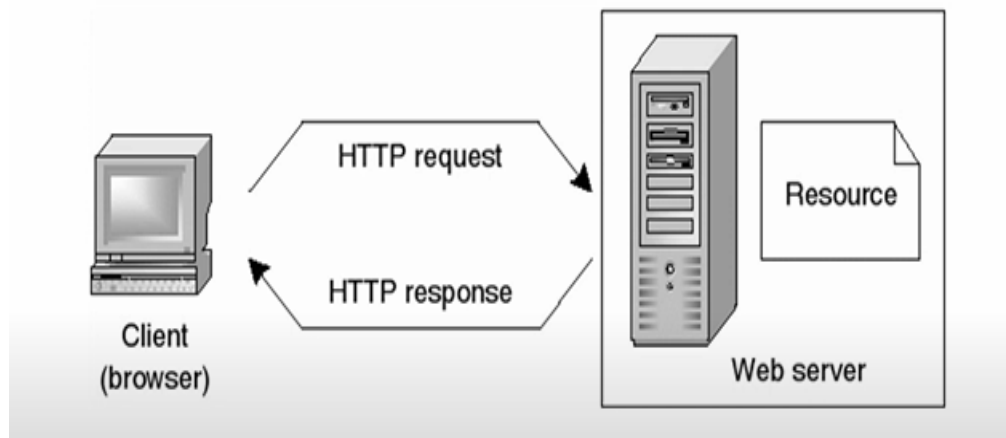

Hyper Text Transfer Protocol

Client-Server

HTTP MEANS

HTTP MAKES SERVER TO UNDERSTAND THE REQUEST
AND CLIENT TO UNDERSTRAND RESPONSE

1) CREATING SERVER

```
const http = require("http");  
const myServer = http.createServer((request, response) => {  
  
})
```

To create port use keyword **listen**

```
const http = require("http");  
const myServer = http.createServer((request, response) => {  
  //to get output  
  response.write("SARANAM AYYAPPA");  
  response.end();  
});  
  
myServer.listen(5500);
```

To start server node filename

To see output → open browser → localhost:5500
