

Array

Array = 

```
sampleArray = ["string", 35, T/F, {username:"Kalyan"}]
```

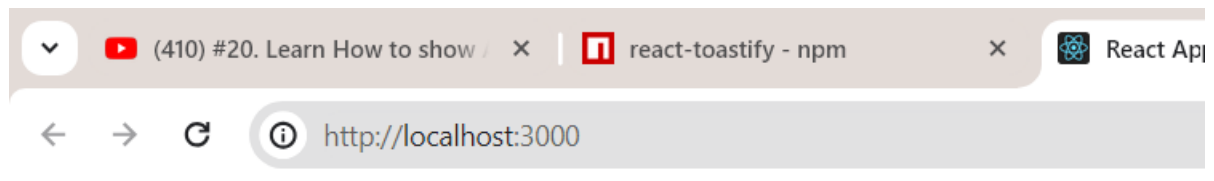

import it in App.js to get out put

```
SampleArray.jsx > [x] SampleArray
import React from "react";

const SampleArray = () => {
  let Array1 = ["varshith", "hardik", 45, { username: "react" }];
  return (
    <div>
      {Array1[0]}
      <h2>{Array1[1]} is topper</h2>
      <h2>my age is {Array1[2]}</h2>
    </div>
  );
};

export default SampleArray;
```

how print dictionaries we will learn in next video

varshith

hardik is topper

my age is 45
