

1. Basic Structure

The basic structure of any HTML document is as follows:

```
1 <!DOCTYPE html>
2 <html>
3   <head></head>
4   <body>
5     Your code goes here
6   </body>
7 </html>
```

2. Heading Element

The HTML `h1` element defines a main heading.

```
i 1 <h1>Tourism</h1>
```

3. Paragraph Element

The HTML `p` element defines a paragraph.

```
i 1 <p>Plan your trip wherever you want to go</p>
```

4. Button Element

The HTML `button` element defines a button.

```
i 1 <button>Get Started</button>
```
