Templete litralels

Max try to use Templete litreals it will upade every time

Templete Literals

⊛ Templete literals are used to point the **Vcouible** in the statement

[`..`] → it be leftside of [1 key]

```
let course = "React Js"

const Temp = () =>
 {
   return (
     <div>
       { `Iam learning ${course}` }
     </div>
   )
 }
```
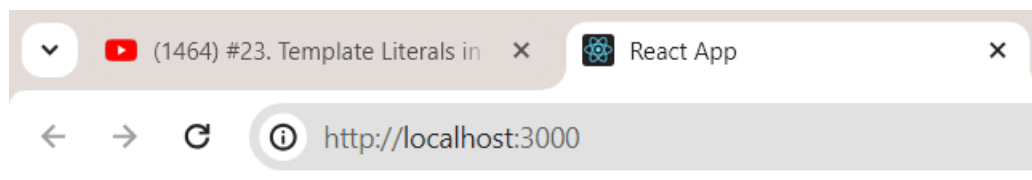

```jsx
import React from "react";

const course = "React JS";

const New = () => {
  return (
    <div>
      <h1>{`Iam Learning ${course}`}</h1>
    </div>
  );
};

export default New;
```

Iam Learning React JS
