# 4.1 HTML Line Break Element
The HTML `br` element helps to break the text and continue it in the next line.

```
<!DOCTYPE html>
<html>
    <head></head>
    <body>
        <p>INDIA IS MY COUNTRY MY NAME IS VARSHITH</p>

        <p>INDIA IS MY COUNTRY</br>
            MY NAME IS VARSHITH</br>
            CSE STUDENT
        </p>
    </body>
</html>
```

INDIA IS MY COUNTRY MY NAME IS VARSHITH

INDIA IS MY COUNTRY
MY NAME IS VARSHITH
CSE STUDENT

# 4.2 HTML Horizontal Rule Element

The HTML `hr` element inserts a horizontal line and helps to separate the content.

```html
<!DOCTYPE html>
<html>
    <head></head>
    <body>
        <hr/>
        <p>INDIA IS MY COUNTRY MY NAME IS VARSHITH</p>
        <hr/>

        <p>INDIA IS MY COUNTRY</br>
            MY NAME IS VARSHITH</br>
            CSE STUDENT
        </p>
        <hr/>
    </body>
</html>
```
