State Management with Conditions

```jsx
src > ⚛ StateMg.jsx > [∅] StateMg
1    import React from "react";
2    import { useState } from "react";
3
4    const StateMg = () => {
5      const [state, setState] = useState("Hyderabad");
6
7      if (state === "Hyderabad") {
8        setState("Vijayawada");
9      }
10
11     return (
12       <div>
13         <h1>I Live in {state}</h1>
14       </div>
15     );
16   };
17
18   export default StateMg;
19
```

lpu

I Live in Vijayawada

In last class we got error of infinite loop it because we are using useState() to avoid we have to useEffect()
